

### **Meeting Objectives**

- Reach consensus on the overall structure of the goal attainment process
- Reach consensus on the specific metrics used to measure goal attainment
- Provide feedback on the proposed scoring structure for the goal attainment process

### **Agenda**

- Walk through each section of the revised student learning synthesis document to determine consensus or flag areas where further discussion is necessary (identify unresolved issues within the goal attainment process)
- Share proposal for the goal attainment scoring structure and discuss to gather group feedback
- Next steps: Next/final (?) meeting and expectations for continued group involvement

### **Looking Ahead**

- Wrap up of final goal attainment process and scoring procedure
- Review and feedback from group on other elements of student learning, including proposal for calculating a final student learning rating and use of student learning in administrator evaluations

### **Guiding Questions**

For the revised synthesis document:

- Are you comfortable presenting the content in this document to ACEES? Are you comfortable claiming the content as a product of this working group?
- What content, if any, is unresolved in your opinion? What needs further discussion before you would be comfortable presenting it as agreed-upon by the group?
- What other outstanding items do you think must be included?

For the proposed scoring structure:

- Are the inputs the correct?
- What are the strengths and limitations of using these inputs to automatically generate a score for each goal?
- What are the strengths and limitations of scoring each individual goal?
- What concerns, if any, do you have about this scoring structure? What do you especially like, if anything, about this scoring structure?
